

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Just how many volumes this magnificent work is intended to make is not stated, but the remaining parts, we are told, will probably be issued in yearly volumes. We trust nothing will prevent its early completion as planned.—J. A. A.

'Audubon Bird Chart No. 2', and 'Common Birds, Second Series.'—The prominence given by the press to the efforts of the Audubon Societies to discourage the use of birds for millinery purposes, has so largely confined the knowledge of the public to this side of their work, that we are glad to call attention to its educational influence, well illustrated by the publication under the auspices of the Massachusetts Audubon Society of its 'Audubon Bird Chart No. 2,' and the accompanying letter-press by Mr. Hoffmann, entitled 'Common Birds, Second Series.'¹ Like Bird Chart No. 1,' which was issued in 1898, it contains life size figures of twenty-six common birds, drawn in colors by Mr. Edward Knobe and reproduced by the Prang Educational Company. While somewhat stiff in outline, the birds, in the main, are posed in characteristic attitudes, and have been lithographed with such remarkable success that but few plates published in this country approach them in accuracy of coloring. The birds represented on the Chart are treated biographically by Mr. Ralph Hoffmann in an accompanying pamphlet of twenty pages. The two combined, therefore, furnish an effective means for becoming acquainted with the appearance and habits of twenty-six species of birds, and they may be heartily commended to students, and especially to teachers.—F. M. C.

Transportation and Sale of Game.—As the 'Lacey Act,' approved May 25, 1900, supplements the existing State laws for the protection of birds and game, "by prohibiting the shipment from one State to another of birds killed in violation of local laws, and by subjecting birds brought into a State to the same restrictions as those prescribed for birds produced within the State," it becomes important to know the provisions of all the local laws on the subject of game and bird protection, which vary not only in different States, but often in different parts of the same State. To render such knowledge generally accessible, a Report² on the subject has been issued by the U. S. Department of Agriculture, forming
